

Activity 5:(Module 5) :-

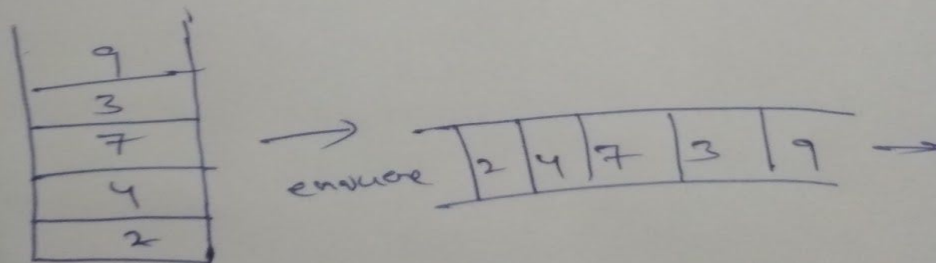

ADS-1

Activity-5:-

let us consider elements in a queue as
2, 4, 7, 3, 9

```
while (!q.isEmpty())  
    stack.push(q.dequeue());  
while (!stack.isEmpty())  
    q.enqueue(stack.pop());
```

so, ~~see~~ here we are reversing
the given queue.
