

Module 19 (Activity - 3):

Module-19

Activity-3 :-

a) floor(Q)

Node $x = \text{floor}(E, Q)$

cmp will be 0
so, return x;

$\therefore Q$ will be returned.

b) select(5)

it will return the value that
is present at index 5 after sorting
the given tree.

c) ceiling(Q)

Node $x = \text{ceiling}(E, Q)$

cmp > 0

ceiling(Q, Q)

cmp = 0

$\therefore Q$ will be returned.

d) rank(J)
 No. of smaller elements
 than J.
 i.e. A, D, E
 = 3

e) size(D, T)
 rank of D = 1
 rank of T = 7

$$= \text{rank}(hi) - \text{rank}(lo) + 1$$

$$= 7 - 1 + 1 = 7$$

7//

f) keys (D, T)

~~D~~ [E J M Q S] T
